## Prices Received Index Down 1 Percent

The Preliminary All Farm Products Index of Prices Received in July was 106 based on 1990-92= 100, down 0.9 percent from the June index. Lower prices for cattle, grapes, celery, and peaches were partially offset by higher prices for soybeans, corn, cantaloupes, and broilers. The seasonal change in the mix of commodities farmers sell often affects the overall index. Higher seasonal marketings of grapes, wheat, tomatoes, and grain sorghum were more than offset by lower marketings of milk, cantaloupes, strawberries, and potatoes.

Compared with July 2000, the All Farm Products Index was 10 percent higher. Price increases from July 2000 for milk, broilers, wheat, cattle, and corn were partially offset by lower prices for lettuce, sweet corn, turkeys, and barley.

## Prices Paid Index Unchanged

The July Index of Prices Paid for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW) was 124 percent of the 1990-92 average. The index was unchanged from June, but 3.3 percent above July 2000. Lower prices in July for nitrogen fertilizers, diesel fuel, gasoline, and insecticides were offset by higher prices paid for feed concentrates, feed supplements, feed grains, hay and forages, and complete feeds.
